Descriptions: beeblex -- go to one level and click key 4 and 2 at the same time to activate Test Mode. Now, when you press certain key combinations, different things will happen. Press 4 and + at the same time to proceed to a level. Press 4 and - go back a level. Press 4 and * (on the numeric keypad) to give yourself more crystals, and make building almost instantaneously. Press 4 and/or (on the numeric keypad) to take away all the darkness. Press 4 and backspace or pagedown to immediately lose the current level. Press 4 and pageup to immediately win the current level.8. Known glitches: Place a building anywhere: Choosing a place to build a building, it is possible to place it in parts of the map that would not normally be able to be placed. This is done by dragging the mouse cursor to another part of the map while you click to place a building in a valid location. As a result, the building will not be built in the valid location, but anywhere your mouse moved before the placement code is activated. This is due to the slight delay between game frames when you first click on the game determines that you clicked on a valid location for the but the building is not placed until the next frame. This gives you as much time as it takes to pass a frame in which time you can move the mouse cursor anywhere on the map. The more lousy the game is, the more time it takes for a frame to expire, the more time you need to place your building anywhere. (An interesting side effect of this malfunction is that the upper half of the area where the building is placed becomes a valid place to build in just the sold, destroyed or otherwise removed from the map.) Fixed by Redux Bugfix Edition and later. Play as the opposing side: Using the beeblex cheat it is possible to play as the opposing side on most levels. If you start on the Astro side, you can continue to jump forward levels until you pass the last Astro level. Once you start the first Alien level you will notice that you are now playing as Astros in Alien levels! This works the same way for aliens, you can start on the alien side and then keep jumping back levels until you pass the first Alien level and end up playing as aliens in the Astro levels! (It should be noted, however, that if you try to go further back from the first Astro level, or ahead of the few bonus levels after the last Alien level, the game will crash and Adobe Flash Player, and your web browser will freeze until the broken script expires.) Fixed by Redux Bugfix Edition and later. Use the new cheat code theotherside to play as the opposing team at any level. Get a special unit: Sometimes it is possible to get one or more additional units after hitting the normal maximum amount of buildable units. Occurs when you press the build button of a unit at exactly the right time, and under certain conditions, which may include the quickbuild cheat. If you time correctly, you will receive one or more additional units beyond the maximum. Fixed by redux bugfix version and later.9. Other multimedia codes/Misc.credits -- 4T2 -- -- You might have heard this, it's supposed to be Amazet2000 -- Something From Nothing - the original T2000 bonus level was re-occupied to serve the purpose of an alien special operations mission, (and featured some light gameplay tweaks). Therefore, the corresponding cheat code required renaming, in THESLIVE (You can, however, use this code for the old version of the game, which has been archived here: and azs8t -- These may have been present in an old version of the game, however, this version has not been found anywhere. (Note: Other websites on the internet may have had their own version of the game with content exclusively on their website, if they played one of them, they may have had different codes.) 10. Q&A:Question: What is the real Alien Special Ops? Answer: THEYLIVE is the only Alien Special Ops code in the game! Special Operations was assigned only to the Astros. (So 3 new levels were created there.) The Alien Special Ops button is activated only if you have played level 5 or higher in Aliens and the XML node is anything but TRUE. These are all codes for the latest available vanilla version of CrystAlien Conflict.Future fan-made game extensions may include new cheats, and will not be listed here. Cheat codes from old versions of the game can not work in newer versions! You can test codes in an earlier version of the game in bar on this site you can choose another version of the game to play. If you find another version of the game that is not listed there, please let me know! You can check the version in the game using the beeblex cheat. I believe@cmanstuff like that doing more may not happen at some point in the future, perhaps. Technically, there's already an existing texture; now, though, it's a matter of the game machine not really claiming that it's found this valuable. Do you think it's valuable?
